# Orach Technic Pro 7.20 (24.472 Glyphs)

## Our other Font Families from Orach Technic Pro

### Orach Technic Pro POLYLINE - Thin (4.500 Glyphs)

Orach Technic Pro POLYLINE-Thin is a special polyline .ttf version of the Orach Technic Pro-Thin font, developed for CAD/CAM, CNC and technical applications.

Every character contains predefined polyline geometry, eliminating the need for automatic curve conversion and providing optimized vector output for older or specialized CAD/CAM software that cannot efficiently convert standard TrueType fonts into clean polyline geometry.

Total 4.500 Glyphs The Orach Technic Pro font has been developed and produce by InfoFORM Belgrade–Serbia, from 1988 to 2026

### Orach Technic Pro 1L - Pass 1 OTF (5.845 Glyphs)

Single-line engraving fonts can be implemented in the OpenType format only as special hybrid solutions. As a result, they do not fully conform to the original purpose of the OpenType standard and may exhibit certain limitations or compatibility issues in some graphic, CAD/CAM, and CNC applications.

For many users, however, these limitations are acceptable in practice.

### Orach Technic Pro 1L - Pass 2 OTF (5.845 Glyphs)

Fonts were developed as specialized alternatives to our standard Orach Technic Pro – Thin font, which already provides a reliable solution for virtually all engraving and marking applications in CNC and laser technology.

Orach Technic Pro - Pass-2 may be beneficial when producing extremely small text (around 1mm high) that is designed in graphic applications before being transferred to engraving systems.

### Orach Technic STENCIL Pro (9.372 Glyphs)

Three styles with 3.124 Glyphs (characters) in one style, and a total of 9.372 Glyphs makes the world technique balanced and better.

Font can support more then 100 Windows keyboards and 100 language, additionally font can support more then 1.600 language.

The Orach Technic Pro STENCIL font family opens up new possibilities in the world of technology, CNC and Lasers machines. It is also unique in that different letter sizes can be cut on a CNC machine with the same tool without any modification of the font. Together with the Orach Technic Pro font, it certainly forms the most complex package fonts in the field of CNC and laser machine technology.

### Orach Technic CJK (30.740 Glyphs)

Opens a completely new and extensive world of characters and ideogram while remaining fully compatible with the Orach Technic Pro font family.

Total 7.685 Glyphs available across all four styles with 30.740 Glyphs.

**\* Total Orach Technic Pro Systems: 80.774 Glyphs**

## Orach Technic Pro 7.20

Serbian linguist and reformer Vuk Stefanović Karadžić (1787-1864).

***Vuk Stefanović Karadžić wrote this:***

“Whatever people in this world have invented, nothing compares to the letters. To send my thoughts on a piece of paper, to a friend who is far away in the world, it is a science that transcends the human mind... And it is safe to say, the one who invented it, he was more God than man.”

## Orach Technic Pro 7.20

Serbia is a small country in the Balkans, but on its soil more than 800 clay tablets have been found, bearing clearly inscribed Vinča symbols dating back to around 5,000 BC.

These inscriptions represent one of the oldest known testimonies to humanity's need to express thoughts, messages, and meanings through signs.

Thousands of years passed from these ancient symbols to the writing systems of today, and it was precisely in this region that one of the most fascinating phonetic writing systems emerged — the Serbian Cyrillic alphabet, in which every sound has its own letter.

From Vinča to the Serbian Cyrillic alphabet, the same human need stretches across thousands of years: to transform speech into writing and preserve thought for future generations.

Serbian linguist Vuk Stefanović Karadžić made a decisive contribution to the reform of the Cyrillic alphabet and its development according to the phonetic principle, resulting in a writing system in which the relationship between sound and letter was brought to an exceptional level of simplicity and consistency.

And that is precisely why the story of the Serbian Cyrillic alphabet is not merely the story of one writing system — it is part of a much longer story of humanity's need to leave its speech, thoughts, and knowledge behind in written form.

Perhaps it is not a coincidence that Orach Technic Pro was created precisely in the land of the Vinča culture and the Serbian Cyrillic alphabet - a typeface that brings together Western and Eastern scripts, written in a unified handwriting, as if a single hand, familiar with all of these scripts, had written them in one continuous line, in a single breath.
