

Orach Technic STENCIL Pro 6.35

infoFORM (1988-2025)

Orach Technic STENCIL Pro - Thin

Orach Technic STENCIL Pro - Light

Orach Technic STENCIL Pro - Regular

Three styles with 3.124 Glyphs (characters) in one style,
and a total of 9.372 Glyphs makes the world technique balanced and better.

Font can support more then 170 Windows keyboards and 100 language,
additionally font can support more then 1.600 language.

The Orach Technic Pro STENCIL font family opens up new possibilities in the world of technology, CNC and Lasers machines. It is also unique in that different letter sizes can be cut on a CNC machine with the same tool without any modification of the font. Together with the Orach Technic Pro font, it certainly forms the most complex package fonts in the field of CNC and laser machine technology.

Font contains Chararacters - Glyphs

- Latin	1.134
- Cyrillic	391
- Greek	373
- Hebrew	81
- Arabic	226
- Japanese	212
- Indian	129
- Korea alhabet	40
- Armenia	92
- Others	446

Total Glyphs: 3.124

About Orach Technic STENCIL Pro

We've been making painting stencils for nearly 40 years. Designing letterforms that look good on paper or on a screen, so the font can actually sell, is one thing. But drawing and producing stencils you can hold in your hands is something entirely different, especially when they're cut from thin materials like 0.5 mm aluminum. Seeing the letters physically "bridged" and perforated changes everything about how you design.

This balance between aesthetically pleasing letter breaks and a physically stronger, more compact stencil structure is what sets our font apart from other stencil typefaces. Of course, design is our top priority, but it can never come at the expense of technical reliability. Whenever we face a dilemma at a particular break point, choosing between visual elegance and structural integrity, we choose the technical solution. After all, this is a functional, engineering-driven stencil font.

We've had this STENCIL font for more than 35 years, refining and expanding it over time. In the beginning it included only the basic Latin, Cyrillic, and Greek alphabets. Only now, in 2025, we've finally completed it to match the full character set of Orach Technic Pro 6.35, making it capable of writing in more than 1,600 languages.

Compared to Orach Technic Pro, we intentionally left out features that have no practical use in a stencil typeface such as Small caps, Braille, Mathematical symbols, and a few other Glyphs.

To avoid the common confusion among TrueType font users who work with letter sizes measured in millimeters, we created the table below. It shows which letter heights can be cut directly using the standard blades commonly used for stencil production.

Any other intermediate size can be produced by applying an inward offset to the outline font equal to half the blade thickness based on the Regular style. Naturally, laser cutters follow the Regular outline precisely, without requiring any offset.
